INSOFTDEV

SmartCar is the pioneer in providing a seamless, all-in-one white-label platform for ground-transportation services

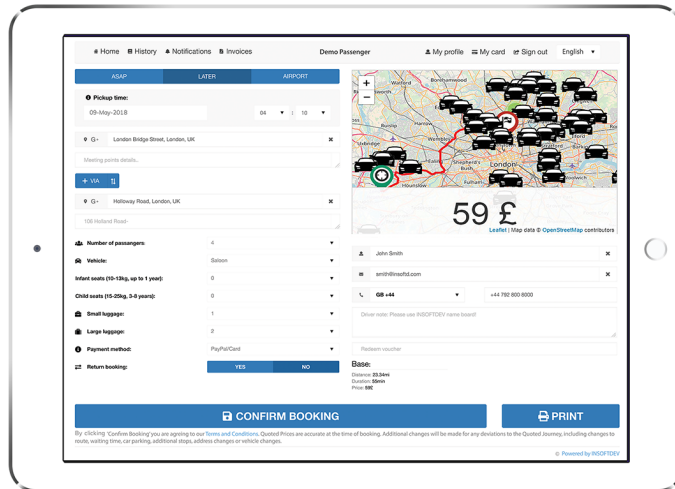

Unlike its competitors, SmartCar does not strive to operate fleets or hire chauffeurs, rather it enables its clients to provide online booking, dispatching and payment services under their own brand names.

Smart2Car helps extend chauffeur driven services coverage outside of home zone, generate aditional revenues and better serve customers.
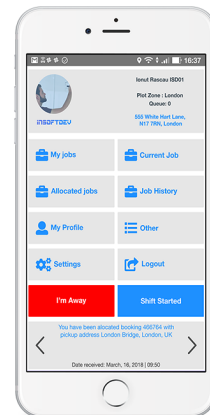

Client-empowering, white-label platform

Our solutions can surely bring your businessan increase in revenue.

> We are so glad that we have finally found a system and development team that are on cutting edge of the latest technology. Insoftdev have managed to provide a solution that has covered all bases for us, the system is fast, user friendly, smart and can be used anywhere. It also offers our customers and drivers very intuitive and smart apps for both Apple and android devices, which is a real bonus. The system that Insoftdev has built is incredibly flexible, scalable and adaptable if we need a new feature in the future.

Steve Gibb

SALES MANAGER, STARBUS AUSTRALIA- SHUTTLE MANAGEMENT SOLUTION

> We adopted SMART2CAR Cloud based solution for Booking and Dispatching since 2015. We have spoken to Ionut around further development of these apps and they are very receptive to be able to match "Uber" type functionality eg pickup from current location or home, office etc. car around the corner, driver approaching text etc.\Been a definite benefit to our business. We hope our comments help and we really recommend them.
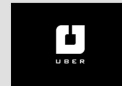

Ionel Tanasa

General Manager, 247 AIRPORT TRANSFER CARS

SmartCar empowers corporate ground transportation businesses by giving them the tools to compete and grow in the digital age

Private drivers were the choice of corporate clients

- Flexible
- High-end
- Professional

Digital startups disrupted market with new services
